Document Tracking Management Syste

MSgt Haddix

DTMS

**The Document Tracking & Management System (DTMS)
was created to build an electronic delivery method for documents between Admin and Disbursing.**

Fielding & Training was completed on 1 August 2003. All Disbursing and Finance Offices have had training on the system, although all are not currently using the application.

Hold backs on implementation revolve around internet connectivity and response time. This should speed up dramatically when the DTMS servers are removed from the lab environment at DFAS and are brought online at

Future Enhancements

- **Interface with MCTFS for Disbursing Diary and Pa**
- **Interface with MCASSP to transfer DAS as an attac**
- **Adding Travel Claims.**
- **Interface with RAPTRS.**
- **Interface with SRD-1.**
- **Future interface with DDS/DSDS.**

Usage and Implementation Completion Deadline

- Highest user rates have been by the Demob Financ
100% of their NAVMC 11116 and 11060's electronica

- All Bases and Stations have been brought online wi
few of their units.

- Deadline for complete implementation of DTMS by
Disbursing/Finance offices is 1 October 2003.

-Future application will interface with the RFF Web S
load reporting.

If you experience problems or receive any error messages while usin
HQMC RFL at DSN 224-4981 / 4982 / 2224.

If you receive an error message, copy the message window by hittin
Screen". This will copy the window. Open Microsoft Word and then
"V". This will paste the error message window into a Word documen

Name the document whatever you want and attach it to an e-mail wi
information you have concerning what you were trying to do when t
